

# Survey on COMPOSE project Transferability Plan

COMPOSE WP4 Deliverable 4.4. aims to prepare the Transferability Plan to reach the widest possible target groups, particularly development planners and policy-makers outside the project, to promote the COMPOSE Methodology Tool and concept of development planning on RES and EE measures. This survey aims to identify the type of actions that each partner will undertake addressed to different target groups, by when and the barriers and successes they foresee for each of these actions.

This survey aims to prioritise the feedback provided by the partners on barriers and challenges on transferability during the joint session of WP3 and WP4 held at the COMPOSE consortium meeting in Rethymno, in June 2017.

\* Απαιτείται

Project co-financed by the European  
Regional Development Fund

Ajuntament de Granollers

1. Please identify any priority actions you aim to undertake transferring good practices related to COMPOSE pilot activities to the relevant target groups in the wider MED area \*

- Communication/Dissemination
- Training/Capacity building
- Direct exchange of experience to transfer good practices
- Agreement with investor/financial actors
- Agreements with local stakeholders
- Other

2. Regarding the priority actions selected in question num. 1, describe the main goal for each one \*

Communication: to transfer the knowledge and experience gained from the pilot reaction to other municipalities, government departments and the private sector.

Training: Adopt training sessions among the employees of the municipalities so that they will finally understand the utilization of the BMS system.

Direct exchange of experience: to other colleagues of municipalities, government departments, architects, engineers, the general public etc.

3. Regarding the priority actions selected in question num. 1, define the duration/ due date (if known) for each one \*

Communication: more intensive for the first six months after the installation of the BMS system and once a year therefore.

Training: The Energy Team of the municipality will be trained immediately after the installation of the BMS system

Direct exchange of experience will commence through meetings immediately after the installation of the BMS system but also through leaflets, postings to the general public. This will be a continuing effort.

#### 4. Which are the three main target groups identified in your case to whom to transfer transfer good practices? \*

- Policy makers at local, regional, national and EU levels
- Research groups with innovation potential
- Thematic networks
- Energy and environment agencies
- Potential investors in similar projects
- Associations of mayors
- Financial institutions
- Rural development associations
- Rural communities and farmers
- Entrepreneurs and private businesses
- Education system (from schools to faculties)
- Local and social media
- Other Interreg MED projects (e.g. GreenCAP)
- RES and EE regional and national decision makers
- Financial entities
- Other

5. Can you name at least three specific organisations in your area which might help you with transferring good practices ? \*

- Union of municipalities
- Cyprus Energy Agency
- Energy department - Ministry of Commerce

6. What are the three main potential barriers identified in your case to transfer good practices? \*

The types of barriers described below are based on the participants' contributions to the joint workshop of WP3 and WP4 held in Rethymno in June 2017

- Legal framework (need to change legal framework)
- Economic/financial
- Institutional (e.g. rigid institutional framework, lack of horizontal networking, etc.)
- Information and communication (e.g. lack of dialogue with main stakeholders, education level, lack of communication between sectors, awareness, etc.)
- Lack of collaboration between professionals and politicians
- Other barriers

7. If you select "Other barriers" in question num. 5, please specify

Η απάντησή σας

8. What are the three main opportunities that help you increase the level of success regarding the transferability of good practices? \*

- Learning programs (e.g on best practices, policy platforms, case studies, etc.)
- Information exchange (e.g. study tours to pilots and visits, workshops, web seminars, exchange with different stakeholder groups, etc.)
- International and European networking and cooperation (e.g. international associations, Interreg cooperation programs, UN, etc.)
- Exchange among national projects
- EU research community (e.g joint research centers)
- Other opportunities

9. If you select "Other opportunities" in question num. 7, please specify

Η απάντησή σας

10. Any other observations regarding transferability

For transferability to succeed in Cyprus is very important for the relevant government departments to adopt policies and practices through the necessary legal framework to help both institution and the general public to adopt.

LET'S COMPOSE - Thank you!
